

C-07 Atomic Requirement Traceability & Acceptance Matrix

Document ID	ROOTS-C07-TRACE-001
Version	1.0.0
Issue date	August 2026
Owner	ROOTS AI HEALTH SYSTEMS, Inc.
Status	APPROVED FULL-COVERAGE TRACE RELEASE
Commercial baseline	

This controlled annex completes the approved ROOTS-AI Phase 1 baseline. It does not replace C-01 through C-05; it makes their implementation inputs directly importable and testable.

Coverage summary

594 atomic source items are mapped to one canonical implementation artifact and one verification test. Headings, constraints, future/out-of-scope statements and measurable acceptance criteria are retained so the source record cannot disappear through summarization.

The supplied questionnaire export mixed form wording with real participant answers and direct identifiers. Those personal values are intentionally excluded because they are not product requirements. All 73 approved questions, their types, validation, conditional logic and option sets are traced from the de-identified C-01 canonical release.

GEN-0148	SRC-03 / 1	ROOTS-AI™ MVP – Phase 1 Technical Requirements Version: 6.0 Date: July 2026 Prepared By: ROOTS-AI™	Master Requirements v3.3	GEN-REVIEW-0148	Covered
TEC-0005	SRC-03 / 2	Document Purpose This document defines the Phase 1 deliverables required from the Technology Development Partner. Phase 1 focuses on building the MVP with core security controls in place while deferring formal certifications and advanced compliance documentation to later phases.	Master + C-06 executable technical baseline		Covered
GEN-0149	SRC-03 / 3	Part One: Core Principles	Master Requirements v3.3	GEN-REVIEW-0149	Covered

UI-0006	SRC-03 / 4	1. Source Code Ownership All source code, UI/UX assets, database schema, prompts, configuration files, documentation, and intellectual property developed specifically for ROOTS-AI™ during Phase 1 shall become the exclusive property of ROOTS-AI™ upon final payment.	C-05 + C-08 editable SVG/tokens	UI-VREG-0006	Covered
UI-0007	SRC-03 / 5	Clarification: Any pre-existing proprietary frameworks, libraries, or tools owned by the Technology Partner shall remain their property unless explicitly transferred in writing. Only code, assets, and intellectual property developed specifically for ROOTS-AI™ are transferred to ROOTS-AI™.	C-05 + C-08 editable SVG/tokens	UI-VREG-0007	Covered
SCR-0013	SRC-03 / 6	Confidential IP: Prompt engineering, scoring methodology, Recovery Potential algorithms, and all related logic—including future modifications made during Phase 1—are confidential trade secrets of ROOTS-AI™ and shall not be disclosed, reused, or repurposed by the Technology Partner for any other project.	C-02 + machine_readable/data/scoring_config	SCR-GOLDEN-0013	Covered
GEN-0150	SRC-03 / 7	No deliverables created specifically for ROOTS-AI™ may be reused, resold, or repurposed by the Technology Partner for any other project.	Master Requirements v3.3	GEN-REVIEW-0150	Covered
GOV-0001	SRC-03 / 8	2. Git Repository Ownership Development must occur in a Git-based repository owned by ROOTS-AI™ (e.g., GitHub).	Agreement v6.5 + Master governance	GOV-AUDIT-0001	Covered
GOV-0002	SRC-03 / 9	The Technology Partner shall be granted access to this repository during the development period. Upon final payment and project acceptance, all access shall be transferred exclusively to ROOTS-AI™.	Agreement v6.5 + Master governance	GOV-AUDIT-0002	Covered
GEN-0151	SRC-03 / 10	3. Version Control Standards Requirement Implementation Main Branch Protected main branch Develop Branch develop branch for integration Pull Requests All changes via PR with review Code Review Required before merging Commit Convention Standardized commit messages	Master Requirements v3.3	GEN-REVIEW-0151	Covered
QA-0013	SRC-03 / 11	4. Coding Standards Requirement Implementation Linting ESLint configured and enforced Formatting Prettier configured and enforced Code Style Consistent style across all files Documentation Inline comments for complex logic	Master §§13-18 + C-07 traceability	QA-UAT-0013	Covered

SCR-0014	SRC-03 / 12	5. Code Quality Requirements Requirement Description Modular Architecture Code must be organized into reusable, independent modules Clean Code Principles Readable, maintainable, and well-documented code TypeScript Strict Mode All frontend/backend code must use TypeScript with strict mode enabled Reusable Components UI components must be reusable across the application No Hardcoded Logic Business logic must be configuration-driven, not hardcoded Configuration-Driven Scoring Scoring engine must be configurable via Admin Dashboard Secure Environment Variables All secrets, keys, and credentials must use environment variables Secrets Management Secrets shall never be stored in source code Code Comments Complex logic must be documented within the code	C-02 + machine_readable/data/scoring_config	SCR-GOLDEN-0014	Covered
GEN-0152	SRC-03 / 13	6. Third-Party Dependencies All third-party libraries, packages, and frameworks must:	Master Requirements v3.3	GEN-REVIEW-0152	Covered
GEN-0153	SRC-03 / 14	Use actively maintained versions (not deprecated or end-of-life)	Master Requirements v3.3	GEN-REVIEW-0153	Covered
GEN-0154	SRC-03 / 15	Have licenses that permit commercial use	Master Requirements v3.3	GEN-REVIEW-0154	Covered
QA-0014	SRC-03 / 16	Be documented with version numbers and purpose in the project documentation	Master §§13-18 + C-07 traceability	QA-UAT-0014	Covered
TEC-0006	SRC-03 / 17	Be reviewed for security vulnerabilities before inclusion	Master + C-06 executable technical baseline		Covered

GEN-0155	SRC-03 / 18	Software Bill of Materials (SBOM): The Technology Partner shall provide an SBOM listing all third-party dependencies and their licenses as part of the final deliverables.	Master Requirements v3.3	GEN-REVIEW-0155	Covered
TEC-0007	SRC-03 / 19	Rationale: This prevents the use of outdated libraries with security vulnerabilities or restrictive licenses that could impact commercial use, and ensures full visibility into the project's dependency chain.	Master + C-06 executable technical baseline		Covered
GEN-0156	SRC-03 / 20	Part Two: Environment & Deployment	Master Requirements v3.3	GEN-REVIEW-0156	Covered
QA-0015	SRC-03 / 21	7. Environment Structure Environment Purpose Development Active development and testing Staging Pre-production validation, UAT, and client review Production Live environment for end users Requirement: All deployments must pass through Staging before Production.	Master §§13-18 + C-07 traceability	QA-UAT-0015	Covered
ASM-0028	SRC-03 / 22	8. Performance Benchmarks Component Performance Requirement Assessment Pages Load within 2 seconds under normal production conditions PDF Generation Complete within ≤15 seconds (excluding external API delays) Admin Dashboard Queries Return within 3 seconds for datasets up to 100,000 records API Endpoints Average response time ≤500ms (excluding external AI provider latency) Report Display Render within 2 seconds of data retrieval Note: Benchmarks shall be measured on Staging or Production using mutually agreed testing conditions.	C-01 + C-05 assessment screens	ASM-UAT-0028	Covered
GEN-0157	SRC-03 / 23	Rationale: Clear performance benchmarks make acceptance objective and measurable.	Master Requirements v3.3	GEN-REVIEW-0157	Covered

TEC-0008	SRC-03 / 24	9. Backups & Disaster Recovery Requirement Implementation Database Backups Daily automated backups enabled Point-in-Time Recovery Where supported by the selected Supabase plan Backup Retention Minimum 30-day retention Backup Testing Quarterly restore testing (post-launch) Rationale: Even in MVP stage, data loss prevention is critical. Automated backups ensure participant data can be recovered if needed.	Master + C-06 executable technical baseline		Covered
GEN-0158	SRC-03 / 25	Part Three: MVP Development Deliverables	Master Requirements v3.3	GEN-REVIEW-0158	Covered
ASM-0029	SRC-03 / 26	10. Core Platform Components # Component Deliverable 1 Landing Page Public-facing marketing page with CTA 2 Assessment Form 73 questions, 13 modules with validation 3 Progress Tracking Visual progress bar with percentage 4 Waist Unit Toggle cm/in with automatic conversion 5 Auto-Save Real-time saving to Supabase 6 Supabase Database 7 tables with RLS enabled 7 Scoring Engine 7 domain scores with configurable weights 8 Recovery Potential Multi-factor algorithm implementation 9 LLM Integration LLM Provider (OpenAI initially) 10 PDF Generator Puppeteer-based pixel-perfect PDF 11 Report Page Display generated report with download 12 Admin Dashboard Participant management + config panel 13 Research Export De-identified CSV/JSON export 14 Magic Link Authentication Passwordless email-based login	C-01 + C-05 assessment screens	ASM-UAT-0029	Covered
SCR-0015	SRC-03 / 27	11. AI Prompt Security Requirement Implementation Prompt templates must not be exposed to end users Store prompts server-side only Governance rules must not be exposed to end users Store rules server-side only Scoring logic must not be exposed to end users Store logic server-side only All prompts are governed templates No dynamic prompt injection from user input Rationale: The scoring logic and prompt templates are valuable intellectual property that must remain confidential and secure.	C-02 + machine_readable/data/scoring_config	SCR-GOLDEN-0015	Covered
ASM-0030	SRC-03 / 28	12. Input Validation Rules Field Validation Rule Height 100-250 cm Weight 25-350 kg Age 16-110 years Waist 40-200 cm (auto-converted from inches)	C-01 + C-05 assessment screens	ASM-UAT-0030	Covered
GEN-0159	SRC-03 / 29	13. N/A Handling (Critical Rule)	Master Requirements v3.3	GEN-REVIEW-0159	Covered

ASM-0031	SRC-03 / 30	When N/A is selected for any question:	C-01 + C-05 assessment screens	ASM-UAT-0031	Covered
ASM-0032	SRC-03 / 31	The question is excluded entirely from the module score calculation	C-01 + C-05 assessment screens	ASM-UAT-0032	Covered
GEN-0160	SRC-03 / 32	It is NOT assigned a value of 0	Master Requirements v3.3	GEN-REVIEW-0160	Covered
ASM-0033	SRC-03 / 33	The module score is calculated based ONLY on answered questions	C-01 + C-05 assessment screens	ASM-UAT-0033	Covered
TEC-0009	SRC-03 / 34	Part Four: Source Code Documentation	Master + C-06 executable technical baseline		Covered

TEC-0010	SRC-03 / 35	14. Required Documentation # Document Description 1 README Project overview, setup instructions, and key information 2 Installation Guide Step-by-step instructions for local development setup 3 Deployment Guide Step-by-step instructions for production deployment 4 Environment Variables Complete list of all environment variables with descriptions 5 API Documentation Swagger/OpenAPI with authentication requirements and example requests/responses 6 Database Schema Complete schema documentation with relationships 7 Architecture Diagram High-level system architecture diagram 8 System Flow Diagram End-to-end data flow diagram 9 ER Diagram Entity-Relationship diagram showing all tables and relationships Rationale: Complete documentation ensures that even if the Technology Partner leaves, any other company can take over the project seamlessly and within hours.	Master + C-06 executable technical baseline		Covered
TEC-0011	SRC-03 / 36	Part Five: Core Security Controls (Must Be Present)	Master + C-06 executable technical baseline		Covered
TEC-0012	SRC-03 / 37	15. Data Encryption Requirement Implementation Data in transit TLS/HTTPS enabled for all endpoints Data at rest Supabase encryption enabled PHI encryption Any stored PHI or health-related identifiable data must be encrypted	Master + C-06 executable technical baseline		Covered
SCR-0016	SRC-03 / 38	16. Access Control (RLS) Requirement Implementation Row Level Security Enabled on ALL tables Participant policy Self-access only Admin policy Full access with role verification MFA for admin Multi-factor authentication for all admin accounts RLS Tables: participants, responses, scores, reports, scoring_config	C-02 + machine_readable/data/scoring_config	SCR-GOLDEN-0016	Covered
TEC-0013	SRC-03 / 39	17. Audit Logs Requirement Implementation Log all access to user data Supabase audit logs enabled Log all configuration changes Admin action logging Log all login attempts Supabase auth logs Log retention Minimum 12 months	Master + C-06 executable technical baseline		Covered
TEC-0014	SRC-03 / 40	18. BAA with Supabase A Business Associate Agreement (BAA) with Supabase must be signed before storing any PHI or health-related identifiable data. ROOTS-AI™ will sign the agreement; the Technology Partner must provide necessary information to initiate the process.	Master + C-06 executable technical baseline		Covered
QA-0016	SRC-03 / 41	Part Six: Phase 1 Documentation Deliverables	Master §§13-18 + C-07 traceability	QA-UAT-0016	Covered

QA-0017	SRC-03 / 43	Part Seven: Testing Requirements	Master §§13-18 + C-07 traceability	QA-UAT-0017	Covered
TEC-0015	SRC-03 / 44	20. Required Testing Test Type Description Status Unit Testing All functions and components with minimum 80% coverage for business logic Required Integration Testing API and database integration tests Required System Testing End-to-end testing of all workflows Required Security Testing OWASP Top 10 vulnerability scan Required User Acceptance Testing (UAT) 7 calendar days after delivery Required	Master + C-06 executable technical baseline		Covered
RPT-0011	SRC-03 / 45	21. Test Reports Required Unit Test Report (with coverage metrics)	C-03 + report.schema.json	RPT-UAT-0011	Covered
RPT-0012	SRC-03 / 46	Integration Test Report	C-03 + report.schema.json	RPT-UAT-0012	Covered
RPT-0013	SRC-03 / 47	System Test Report	C-03 + report.schema.json	RPT-UAT-0013	Covered
RPT-0014	SRC-03 / 48	Security Test Report (OWASP Top 10 scan results)	C-03 + report.schema.json	RPT-UAT-0014	Covered
GEN-0161	SRC-03 / 49	Bug Tracker (list of all bugs identified with status)	Master Requirements v3.3	GEN-REVIEW-0161	Covered
RPT-0015	SRC-03 / 50	UAT Completion Report	C-03 + report.schema.json	RPT-UAT-0015	Covered
GEN-0162	SRC-03 / 51	22. Definition of "Complete" A deliverable shall be considered complete only when it is:	Master Requirements v3.3	GEN-REVIEW-0162	Covered
GEN-0163	SRC-03 / 52	Implemented	Master Requirements v3.3	GEN-REVIEW-0163	Covered
QA-0018	SRC-03 / 53	Tested	Master §§13-18 + C-07 traceability	QA-UAT-0018	Covered
GEN-0164	SRC-03 / 54	Documented	Master Requirements v3.3	GEN-REVIEW-0164	Covered
GEN-0165	SRC-03 / 55	Deployed to the Staging environment	Master Requirements v3.3	GEN-REVIEW-0165	Covered
QA-0019	SRC-03 / 56	Accepted during UAT	Master §§13-18 + C-07 traceability	QA-UAT-0019	Covered
WEB-0027	SRC-03 / 57	Rationale: This eliminates any ambiguity about what "complete" means.	C-04 + C-05 public/legal screens	WEB-UAT-0027	Covered
GEN-0166	SRC-03 / 58	Part Eight: Defect Severity Classification	Master Requirements v3.3	GEN-REVIEW-0166	Covered
TEC-0016	SRC-03 / 59	23. Severity Levels Severity Definition Critical Prevents system usage OR causes data loss OR compromises security High Disables a core functionality without a practical workaround Medium Impacts non-critical features, but a workaround exists Low Cosmetic issues, minor UI bugs, or non-critical improvements Acceptance Criteria: No critical or high-severity defects shall remain open at final acceptance.	Master + C-06 executable technical baseline		Covered
QA-0020	SRC-03 / 60	Part Nine: Knowledge Transfer & Handover	Master §§13-18 + C-07 traceability	QA-UAT-0020	Covered
QA-0021	SRC-03 / 61	24. Knowledge Transfer Session Upon final delivery, the Technology Partner shall provide:	Master §§13-18 + C-07 traceability	QA-UAT-0021	Covered

ASM-0034	SRC-03 / 62	Item Description Structured Handover Session 2–4 hour session covering architecture, deployment, configuration, and future maintenance Recorded Session Recording of the handover session for future reference Technical Q&A Opportunity for ROOTS-AI™ team to ask questions Access Transfer All access, credentials, and documentation transferred Rationale: This ensures ROOTS-AI™ can maintain, update, or transition the project to another team in the future.	C-01 + C-05 assessment screens	ASM-UAT-0034	Covered
GEN-0167	SRC-03 / 63	Part Ten: Deferred Items (NOT Required in Phase 1)	Master Requirements v3.3	GEN-REVIEW-0167	Covered

ASM-0035	SRC-03 / 64	25. Deferred Certifications, Audits & Documentation Item Deferral Reason SOC 2 Type I/II Certification Not needed until enterprise clients require it HIPAA Compliance Review / Program Not needed until US hospital contracts HITRUST Certification Only needed for pharmaceutical clients EU AI Act Documentation Not needed until European expansion Model Card Can be developed later with more data Bias Assessment Can be performed later with more user data Detailed Risk Register Can be developed later Full Incident Response Plan Can be developed later Business Continuity Plan Can be developed later Disaster Recovery Plan Can be developed later Penetration Test Report Can be performed later Advanced Compliance Policies Can be developed later Note: The items listed above will be addressed post-funding and are NOT required for Phase 1 delivery.
