markdown

ROOTS-AI™ C-08 Editable UI/UX Handoff

****Package:**** ROOTS_AI_C08_Editable_UIUX_Handoff_v1.0.0

****Version:**** 1.0.0

****Package Issue Date:**** August 2026

****Owner:**** ROOTS AI HEALTH SYSTEMS, Inc.

****Status:**** PHASE 0 — FOR REVIEW

1. Package Overview

This package contains the editable UI/UX and brand asset handoff for the ROOTS-AI™ Phase 1 MVP as required by ****C-08**** of the implementation baseline.

| Metric | Count |

|-----|-----|

| Total Screens | 48 |

| Total SVG Files | 192 |

| Breakpoints per Screen | 4 (360, 768, 1024, 1440) |

| Brand Assets | To be delivered and approved in Phase 0B |

| Source Images | To be delivered as required before each dependent screen phase |

| Font Files | To be provided in Phase 0B, subject to licensing |

| Design Tokens | Included |

| Screen Catalog | Included |

Each SVG must satisfy the production-readiness and validation requirements defined in this README before acceptance.

2. Document Authority

The signed ROOTS-AI™ Software Development Agreement Version 7.3 and its Controlled Baseline govern the project.

Within the design handoff:

- ****C-01**** controls canonical questions, options, required/N/A rules and module order.
- ****C-02**** controls deterministic scoring, classifications, drivers and Golden Tests.
- ****C-03**** controls report content, report structure and report visual requirements.
- ****C-04**** controls the exact website, legal, consent, system and error copy.
- ****C-05**** controls screen composition, navigation, responsive behavior, components, states and role visibility.
- ****C-06**** controls the executable technical baseline.
- ****C-07**** controls atomic traceability, evidence and acceptance.
- ****C-08**** supplies editable design frames, tokens and approved design assets.

No file in this package amends or narrows the signed Agreement or Controlled Baseline.

If an SVG conflicts with any applicable governing Controlled Baseline document, the implementer must stop work on the affected component and raise a written clarification through the ROOTS Change Control process.

4. Screen Inventory Summary

```
| Category | Screens | SVG Files |
|-----|-----|-----|
| PUBLIC | 12 | 48 |
| LEGAL | 5 | 20 |
| ASSESSMENT | 11 | 44 |
| REPORT | 5 | 20 |
| ADMIN | 10 | 40 |
| SYSTEM | 5 | 20 |
| **TOTAL** | **48** | **192** |
```

4.1 PUBLIC Screens (12)

```
| ID | Name | Route |
|----|-----|-----|
| PUB-01 | Home | / |
| PUB-02 | How It Works | /how-it-works |
| PUB-03 | Platform | /platform |
```

PUB-04 Example Report /example-report
PUB-05 Research /research
PUB-06 Healthcare Professionals /healthcare-professionals
PUB-07 Pilot /pilot
PUB-08 About /about
PUB-09 Contact /contact
PUB-10 Contact Confirmation /contact?status=sent
PUB-11 Blog Landing /blog
PUB-12 Blog Article Template /blog/[slug]

4.2 LEGAL Screens (5)

ID Name Route
---- ----- -----
LEG-01 Privacy /privacy
LEG-02 Terms /terms
LEG-03 Cookies /cookies
LEG-04 Medical Disclaimer /medical-disclaimer
LEG-05 AI Disclaimer /ai-disclaimer

4.3 ASSESSMENT Screens (11)

ID Name Route
---- ----- -----
ASM-01 Assessment Entry /assessment
ASM-02 Secure Link Requested /assessment/check-email

ASM-03 Invalid or Expired Link /assessment/link-error
ASM-04 Consent /assessment/consent
ASM-05 Assessment Introduction /assessment/start
ASM-06 Module Question Shell /assessment/[session]/module/[1..13]
ASM-07 Save and Exit Parent: ASM-06 (modal)
ASM-08 Resume Summary /assessment/[session]/resume
ASM-09 Review and Submit /assessment/[session]/review
ASM-10 Report Generating /assessment/[session]/submitted
ASM-11 Submission Recovery submitted:error

4.4 REPORT Screens (5)

ID	Name	Route
----	-----	-----
RPT-01	Report Access	/report/[id] (entry gate)
RPT-02	Interactive Report	/report/[id] (authorized access)
RPT-03	Report Section Navigation	report:navigation
RPT-04	PDF Preparation	report:download
RPT-05	Report Access Error	/report/[id]:error

4.5 ADMIN Screens (10)

ID	Name	Route	Permission
----	-----	-----	-----
ADM-01	Admin Sign-in and MFA	/admin	Privileged users
ADM-02	Operations Overview	/admin/dashboard	Admin/Super Admin

ADM-03	Participants	/admin/participants	Admin
ADM-04	Participant Detail	/admin/participants/[id]	Admin
ADM-05	Report Operations	/admin/reports	Admin
ADM-06	Configuration Releases	/admin/configuration	Admin/Super Admin
ADM-07	Configuration Detail	/admin/configuration/[version]	Admin/Super Admin
ADM-08	Audit Viewer	/admin/audit	Super Admin
ADM-09	Research Export	/admin/research-export	Research Admin
ADM-10	Users and Roles	/admin/access	Super Admin

4.6 SYSTEM Screens (5)

ID	Name	Route
----	-----	-----
SYS-01	Cookie Consent	global overlay
SYS-02	404	unknown route
SYS-03	500 / Service Error	global boundary
SYS-04	Maintenance	/maintenance
SYS-05	Offline / Reconnect	sensitive workflows

5. File Naming Convention

5.1 SVG Files

{SCREEN_ID}_{BREAKPOINT}.svg

text

****Examples:****

- PUB-01_360.svg
- PUB-01_768.svg
- PUB-01_1024.svg
- PUB-01_1440.svg

The resolved file path is: `directory` + `/` + `frame filename`.

Example: `04\_SCREEN/PUBLIC/PUB-01/PUB-01\_360.svg`

5.2 Breakpoints

Breakpoint	Width	Use
-----	-----	-----
360	360px	Mobile (4 columns, 16px gutters)
768	768px	Tablet (8 columns, 24px gutters)
1024	1024px	Desktop (12 columns, 24px gutters)
1440	1440px	Wide (max content width 1200px)

5.3 Directory Structure per Screen

PUB-01/

- ├─ PUB-01_360.svg
- ├─ PUB-01_768.svg
- ├─ PUB-01_1024.svg
- └─ PUB-01_1440.svg

text

6. Importing into Figma

6.1 Recommended Workflow

1. Extract the ZIP archive
2. Open Figma and create a new file
3. Drag and drop any SVG file directly into Figma
4. Figma will import the SVG as editable vector layers
5. Colors match design_tokens.json exactly
6. Typography uses Inter with Arial fallback

6.2 Important Notes

Each SVG must be tested after import into Figma to confirm that text, groups and required layer names remain editable.

- Layers are named according to zones (e.g., `header`, `hero`, `footer`)
- Text is editable and not converted to paths
- Colors are exact hex values from design_tokens.json
- Fonts are referenced as system fonts; actual font files to be delivered in Phase 0B

7. Quality Assurance Requirements

7.1 Automated Validation (To be completed before final handoff)

The validation_report.json in 05_QA/ will verify:

- 192 SVG files are present
- All file names match the manifest
- All SVG files are valid XML
- No elements extend outside the viewBox
- Each file has ``<title>`` and ``<desc>``
- Each file has ``data-screen-id``, ``data-size`` and ``data-permission``
- Routed screens must include ``data-path``
- Modal and overlay screens must include ``data-presentation`` and, where applicable, ``data-parent-screen-id`` instead of ``data-path``
- All referenced assets exist
- No placeholder text remains
- Each screen matches screen_catalog.json

7.2 Visual Regression (To be completed before final handoff)

- Reference screenshots at 360, 768, 1024, and 1440px for every screen/state family
- Visual regression test baseline and results to be included

8. Conflict Reporting

If an SVG conflicts with any applicable governing Controlled Baseline document, the implementer must stop work on the affected component and raise a written clarification through the ROOTS Change Control process.

9. Version Control

Version	Date	Changes
-----	-----	-----
1.0.0	August 2026	Initial foundation release
