

ROOTS-AI™ C-04

Website Content & Legal Copy Pack — Version 1.0.1 CORRECTED

Document ID: ROOTS-C04-WEB-001

Status: APPROVED EXECUTABLE CONTENT RELEASE — CONTROLLED CORRECTION

Effective date: 21 July 2026

Controlled dependencies: C-01 Canonical Question Bank v1.0.1; C-02 Canonical Scoring Rules & Golden Tests v1.0.1; C-03 Report Content & Visual Reference Pack v1.0.1. These controlled sources govern assessment validation, deterministic scoring/driver outputs, and report structure respectively.

This document supplies production-ready English copy for every Phase 1 public, legal, assessment, report and admin route. Dynamic system values are identified by braces and are not editorial placeholders.

1. Global Content Rules

- Brand: ROOTS-AI™. Product statement: “Medicine Before Symptoms™.”
- Primary CTA: “Start Your Assessment”. Secondary CTA: “View Example Report”.
- Never claim diagnosis, disease prevention, cure, guaranteed weight loss, clinical validation or medical-device status.
- Public future capabilities are labelled “Coming Soon”; they are not represented as available.
- Protected routes contain no marketing analytics, session replay or advertising pixels.
- Dynamic variables such as {report_id} and {participant_name} are populated by the application and escaped before rendering.

2. Navigation and Footer

Area	Approved labels/copy
Primary navigation	Home • How It Works • Platform • Research • Healthcare Professionals • Example Report • About
Primary action	Start Your Assessment
Footer product	Assessment • Example Report • How It Works • Platform
Footer company	About • Research • Healthcare Professionals • Pilot Program • Contact • Blog
Footer legal	Privacy • Terms • Cookies • Medical Disclaimer • AI Disclaimer
Footer line	© 2026 ROOTS AI HEALTH SYSTEMS, Inc. All rights reserved.
Footer boundary	ROOTS-AI™ provides educational wellness information and does not diagnose or treat medical conditions.

3. Production Page Copy

/ — Home

Element	Approved copy
Headline	Decode the Biology Before You Fight the Weight
Intro	ROOTS-AI™ turns a structured assessment into a governed biological intelligence report—helping you understand patterns in metabolism, hunger, sleep, circadian timing, stress, inflammation-related signals and perceived biological resistance.
CTA	Start Your Assessment • View Example Report

- Beyond a number on the scale — see the pattern behind the struggle.
- Seven biological domains — one connected view.
- Deterministic scores — AI assists with explanation, not calculation.
- Your report — 19 transparent sections with your answers and limitations.
- Private by design — controlled access, versioning and audit.
- Educational, not diagnostic — designed to support informed conversations and realistic next steps.

/assessment — Assessment

Element	Approved copy
Headline	Your ROOTS Biological Assessment
Intro	Answer 73 questions across 13 short modules. Most people finish in about 10–12 minutes. You can save, pause and resume securely.
CTA	Begin Assessment

- Use your usual experience during the last four weeks unless a question says otherwise.
- There are no “good” answers. Choose what best reflects your experience.
- N/A is available only where approved and is never treated as zero. Required multi-select questions must contain one or more approved option IDs; an empty array is invalid. None/N/A options are exclusive where provided and must not be combined with other options.
- Your answers generate educational wellness indicators, not a diagnosis.
- If you may be in immediate danger, contact local emergency services; this form is not monitored for emergencies.

/report/[id] — Authorized Report

Element	Approved copy
Headline	Your ROOTS Biological Intelligence Report™
Intro	This report summarizes your submitted answers using deterministic scoring rules and governed explanatory language.
CTA	Download PDF

- Show generated date, report ID and version.
- Display all 19 sections from the canonical report JSON.
- Show “Not enough information” for null domains.
- Display the full Medical and AI Disclaimer.

/example-report — Example Report

Element	Approved copy
Headline	See What Your Biological Report Looks Like
Intro	Explore the full 19-section structure using fictional sample data. The example does not represent a real person or a clinical result.
CTA	View Example • Start Your Assessment

- Seven-domain breakdown.
- Deterministic driver outputs and available protective factors. The interface must support zero to three driver outputs, including a co-primary pair as one output entry, without inventing missing drivers or protective factors.
- 90-day educational roadmap.
- Transparent answers, limitations and disclaimer.

/how-it-works — How It Works

Element	Approved copy
Headline	From Answers to Biological Intelligence
Intro	ROOTS-AI™ follows a controlled sequence so that interpretation never replaces the underlying data.
CTA	Start Your Assessment

- 1. Complete the 73-question assessment.
- 2. Validation normalizes approved responses and preserves N/A.
- 3. Deterministic rules calculate seven domains and derived indicators.
- 4. C-02 v1.0.1 deterministic rules select driver outputs, confidence and eligible content; no website or AI layer may independently recalculate or replace them.
- 5. Governed AI may express only C-02/C-03-approved explanation objects in clear language; it cannot change scores, classifications, drivers, null states or report structure.
- 6. The web and PDF reports render from the same immutable report record.

/platform — Platform

Element	Approved copy
Headline	One Foundation. Deeper Layers Over Time.
Intro	Phase 1 delivers the assessment and governed report engine. Future layers will expand biological context only after separate validation, governance and implementation.
CTA	Explore the Assessment

- Available: Assessment and governed report engine.
- Coming Soon: Laboratory data integration.
- Coming Soon: DNA and epigenetic insights.
- Coming Soon: Microbiome analysis.
- Coming Soon: Wearable integrations.
- Coming Soon: ROOTS Biological Twin™.

/research — Research

Element	Approved copy
Headline	Building Biological Intelligence Responsibly
Intro	ROOTS-AI™ is designed to support ethical pilot studies and de-identified research under separate consent, data minimization and documented governance.
CTA	Research Enquiries

- Service consent and research consent are separate.
- Research export excludes direct identifiers and report narratives.
- Pseudonymized data is not described as anonymous unless the methodology supports that claim.
- Pilot findings will be reported with limitations; questionnaire scores are not clinical endpoints unless separately validated.

/healthcare-professionals — Healthcare Professionals

Element	Approved copy
Headline	A Transparent Educational Report for Better Conversations
Intro	ROOTS-AI™ helps participants organize self-reported patterns before discussing persistent concerns with a qualified professional. It does not replace clinical history, examination, diagnosis or care.
CTA	View Example Report

- See the exact answers behind each score.
- Review data completeness and confidence.
- Distinguish deterministic calculation from AI-assisted wording.
- Use suggested laboratory discussions only as optional conversation prompts.

/pilot — Free Beta/Pilot

Element	Approved copy
Headline	Join the ROOTS-AI™ Free Beta
Intro	The beta explores whether a structured, non-diagnostic assessment can help people understand self-reported patterns involving weight resistance, energy, sleep, stress and appetite.
CTA	Check Eligibility

- Eligibility: adults aged 18 or older unless a separately approved local workflow applies.

- Participation is voluntary and may be withdrawn according to the Privacy Notice.
- The report is educational and is not medical care.
- Beta feedback may be used to improve usability; research use requires separate explicit consent.
- No payment is required for the approved beta cohort.

/about — About

Element	Approved copy
Headline	Medicine Before Symptoms™
Intro	ROOTS-AI™ was created around a simple idea: biology often adapts long before a diagnosis is made. Our role is not to label disease, but to help people see patterns earlier, ask better questions and choose realistic next steps.
CTA	How It Works

- Mission: make complex biological patterns understandable without turning an educational tool into a diagnosis.
- Method: structured data, deterministic rules, governed language and visible limitations.
- Company: ROOTS AI HEALTH SYSTEMS, Inc., Delaware, USA.

/contact — Contact

Element	Approved copy
Headline	Start the Right Conversation
Intro	Use the secure form for product support, privacy requests, research collaboration or business enquiries. Do not send urgent medical information.
CTA	Send Enquiry

- Fields: enquiry type, name, email, message, consent checkbox.
- Message limit: 2,000 characters.
- Confirmation: “Thank you. Your enquiry has been received. We will respond through the contact details you provided.”
- Emergency notice: “This form is not monitored for emergencies. Contact local emergency services if you may be in immediate danger.”

/blog — Insights

Element	Approved copy
Headline	Medicine Before Symptoms™ — Insights
Intro	Educational articles about metabolism, hunger, sleep, circadian biology, stress, behaviour and responsible health technology.
CTA	Explore Insights

- Every article displays author, review date, sources and educational disclaimer.
- No article is personalized medical advice.
- Launch empty state: “Our first evidence-informed insights are being prepared. Please return soon.”

/admin — Protected Administration

Element	Approved copy
Headline	ROOTS-AI™ Administration
Intro	Authorized operations only. All access and material actions are logged.
CTA	Sign In

- Navigation: Participants • Assessments • Reports • Configuration • Audit • Research Exports • System Status.
- Configuration states: Draft • Reviewed • Published • Retired.
- Publish warning: “Publishing creates an immutable version for new reports. Historical reports will not be recalculated.”
- Export warning: “Research export requires an approved purpose, role and separate research consent.”

4. Privacy Notice — /privacy

Who we are

ROOTS AI HEALTH SYSTEMS, Inc. (“ROOTS-AI™”, “we”, “us”) provides an educational biological assessment and reporting service. This notice explains how we handle personal data when you use the Phase 1 web platform.

Data we collect

Account and contact information; assessment answers; physical measurements you provide; consent records; generated scores and reports; device, security and audit information; support enquiries; and limited public-site analytics where consent is required. We do not intentionally collect emergency information through the assessment.

Why we use it

To provide, secure and improve the service; save and resume assessments; generate and deliver reports; respond to enquiries; meet legal and security obligations; and conduct separately consented research or pilot analysis.

Sensitive data

Assessment answers and identifiable wellness information may be sensitive personal data. We process them only for stated purposes and with appropriate consent or other lawful authority required by applicable law.

Research

Research participation is optional and requires separate explicit consent. Service access is not conditioned on research consent. Approved research exports are minimized and pseudonymized or de-identified; direct identifiers, authentication data and report narratives are excluded.

Providers and transfers

We may use approved hosting, authentication, email, AI-language and security providers under written safeguards. Identifiable assessment data is not sent to an AI provider unless the approved configuration, agreements and minimization controls permit it. Cross-border transfers are assessed and governed under applicable transfer requirements, including documented review of the destination, recipient safeguards and other legally required transfer conditions before deployment.

AI use

Deterministic rules calculate scores and classifications. AI may assist with approved explanatory wording using minimized structured inputs. AI does not diagnose, prescribe or change scores.

Retention

Assessment, report, consent, audit and security records are retained according to the approved retention schedule and legal needs. Data is deleted or de-identified when no longer required, subject to security backups and legal obligations.

Security

We use access controls, MFA for privileged roles, encryption in transit and at rest where supported, private report storage, audit logging, backups and security testing. ROOTS-AI™ maintains a documented personal-data-breach response process and, where applicable, will notify the Personal Data Protection Commissioner and affected data

subjects in the manner and time required by law. Where applicable, a Data Protection Officer is appointed and notified to the Commissioner in accordance with current requirements. No system can guarantee absolute security.

Your choices and rights

Depending on applicable law, you may request access, correction, deletion, restriction, withdrawal of consent, information about processing or a copy of relevant data. Withdrawal does not affect earlier lawful processing and may limit service functions that require the data.

Cookies and analytics

Essential technologies support authentication and security. Optional public-site analytics are used only where permitted and consented. Assessment, report, authentication and admin routes do not use advertising pixels, session replay or behavioural advertising.

Children

Production launch is intended for adults aged 18 or older. Participation below 18 is not enabled unless ROOTS-AI™ approves and implements a jurisdiction-specific consent and guardian workflow.

Contact

Submit privacy questions or rights requests through the secure Contact page and choose “Privacy”. We may verify identity before fulfilling a request.

Updates

We may update this notice when the service or law changes. The page displays the effective date and version; material changes are communicated where required.

Effective date: 21 July 2026 • Version: 1.0.1. This notice is designed with reference to Malaysia’s Personal Data Protection Act 2010, the Personal Data Protection (Amendment) Act 2024, applicable commencement instruments, and current official guidance and circulars, including data-breach notification, Data Protection Officer and cross-border transfer requirements. It does not represent certification of compliance.

5. Terms of Service — /terms

Agreement and eligibility

By accessing ROOTS-AI™, you agree to these Terms and the Privacy Notice. You must be at least 18 years old for the production launch unless a separately approved minor workflow applies. Do not use the service if you cannot lawfully agree.

Educational service

ROOTS-AI™ provides educational wellness information from self-reported answers. It is not a medical device, healthcare provider, diagnostic service, clinical assessment, prognosis or emergency service.

No medical reliance

Do not use ROOTS-AI™ to diagnose, treat or prevent disease, make medication decisions, delay professional care or respond to an emergency. Seek qualified professional advice for medical concerns.

Your information

Provide information you are authorized to submit and that reasonably reflects your experience. You are responsible for reviewing your submitted answers and protecting access to your email and Magic Link.

Reports and scores

Scores are proprietary questionnaire indicators. They are not clinically validated probabilities of disease, future outcomes or treatment response. Reports may contain AI-assisted wording governed by deterministic outputs and fixed safety rules.

Acceptable use

Do not bypass security, access another person's data, scrape the service, introduce malware, reverse engineer confidential scoring logic, misuse reports for employment or insurance decisions, or represent output as a diagnosis.

Intellectual property

ROOTS-AI™ software, content, scoring methods, prompts, designs and trademarks belong to ROOTS AI HEALTH SYSTEMS, Inc. or its licensors. Personal use of your own report is permitted; no other licence is granted.

Availability and beta

The service may change, pause or contain beta limitations. We may correct errors, suspend unsafe activity and preserve historical report versions. Future capabilities marked Coming Soon are not part of the current service.

Disclaimers

To the extent permitted by law, the service is provided without a guarantee of uninterrupted availability, fitness for a clinical purpose or a particular health or weight outcome. Nothing excludes rights that cannot lawfully be excluded.

Limitation

To the extent permitted by law, ROOTS-AI™ is not liable for decisions made by treating educational output as medical advice, indirect loss or loss caused by unauthorized account access outside our reasonable control. Applicable consumer rights remain unaffected.

Suspension and termination

You may stop using the service. We may suspend access for security, unlawful use or material breach. Data handling after termination follows the Privacy Notice and retention schedule.

Governing framework

The governing-law and forum text for production is a jurisdiction-controlled deployment variable and must be legally approved for each launch market before that market is enabled. Until that approved jurisdiction-specific text is configured, this clause must not be presented as a final governing-law selection. Mandatory consumer and data-protection rights continue to apply.

Contact and changes

Questions may be submitted through the Contact page. The current version and effective date appear on this page. Continued use after a notified change constitutes acceptance where permitted by law.

Effective date: 21 July 2026 • Version: 1.0.1. Final production deployment requires jurisdiction-specific legal review and approval, including the governing-law/forum block, before each launch market is enabled.

6. Cookie Notice — /cookies

Category	Phase 1 treatment	Consent/control
Strictly necessary	Authentication, secure sessions, CSRF protection, load balancing and preference storage	Always active where necessary for service delivery and security.
Public-site analytics	Aggregate page and conversion measurement on public pages only	Disabled until required consent; withdraw through cookie controls.

Category	Phase 1 treatment	Consent/control
Advertising	No behavioural advertising or retargeting in Phase 1	Not used.
Session replay	Prohibited on assessment, report, authentication and admin routes	Not used on protected routes.
Health data	Never placed in analytics, advertising or replay payloads	Mandatory technical control.

Cookie banner copy: “We use essential technologies to keep ROOTS-AI™ secure. With your permission, we may use limited analytics on public pages. We do not use advertising pixels or session replay on assessment, report, sign-in or admin pages.” Buttons: “Accept optional analytics” • “Reject optional analytics” • “Manage choices”.

7. Medical Disclaimer — /medical-disclaimer

ROOTS-AI™ provides educational wellness information based primarily on self-reported answers. It is not a medical device, doctor, healthcare provider, diagnostic test, clinical risk assessment, prognosis or treatment service. It does not establish a clinician-patient relationship and does not replace medical history, examination, laboratory testing or professional judgment. Do not start, stop or change medication, supplements, diet, exercise or treatment because of a ROOTS-AI™ report without appropriate professional advice. Questionnaire scores are proprietary indicators and are not validated probabilities of disease or future outcomes. Persistent, severe, sudden or worsening symptoms require appropriate professional evaluation. If you believe you may be in immediate danger, contact local emergency services.

8. AI Disclaimer — /ai-disclaimer

ROOTS-AI™ uses the approved C-02 v1.0.1 deterministic rules to calculate questionnaire scores, classifications, driver outputs, data-quality indicators and eligible content. C-03 v1.0.1 governs report structure, null states and approved explanation objects. An AI language model may assist only in expressing approved information clearly. The model is not permitted to calculate or change scores, classifications, drivers or null states; diagnose disease; prescribe treatment; interpret laboratory results; or invent participant facts. AI-assisted text can be incomplete or imperfect; fixed validation, logging and fallback rules are applied. Review the underlying answers and limitations, and consult a qualified professional for medical decisions.

9. Consent and System Messages

ID	Approved production copy
CONSENT-SERVICE	I agree to the Terms of Service and acknowledge the Privacy Notice and Medical and AI Disclaimers. I understand that ROOTS-AI™ is educational and not a diagnosis or medical service.
CONSENT-RESEARCH	Optional: I consent to the use of approved, minimized and pseudonymized assessment data for the research purpose described in the Pilot Information Sheet. I understand that I may decline without losing service access and may withdraw according to the Privacy Notice.
SAVE	Saved
SAVE-FAIL	We could not save this answer. Check your connection and try again. Your current entry remains on this device until you leave or refresh.
SESSION-EXPIRED	For your security, this session has expired. Request a new secure link to continue.
REPORT-GENERATING	Your report is being prepared. Scores are calculated first; governed explanatory content follows.
REPORT-FAIL	Your answers were submitted safely, but the report could not be completed. Try again later or contact support through the Contact page.
NULL-DOMAIN	Not enough information was available to calculate this domain. No missing answer was replaced or guessed.
DELETE-CONFIRM	This request may permanently remove eligible service data after identity verification and applicable retention checks. Historical audit records may be retained where legally required.

10. SEO and Metadata

Route	Title	Description
/	ROOTS-AI™ — Decode the Biology Before You Fight the Weight	A governed biological assessment and educational report across seven connected domains.
/assessment	ROOTS Biological Assessment™	Complete 73 questions across 13 modules and receive a transparent educational report.
/example-report	ROOTS-AI™ Example Biological Report	Explore the 19-section structure using fictional sample data.
/how-it-works	How ROOTS-AI™ Works	See how deterministic scoring and governed AI-assisted explanations create your report.
/platform	ROOTS-AI™ Platform	Assessment and governed reporting now; deeper biological layers coming later.
/research	ROOTS-AI™ Research	Learn about ethical pilots, separate research consent and minimized data use.
/about	About ROOTS-AI™	Medicine Before Symptoms™ — structured biological intelligence with visible limitations.
